SKILLS

Languages

- Python
- SQL
- JavaScript (basic)

Frameworks & Tools

- Django
- REST APIs
- Streamlit
- pandas
- Git / GitHub

Databases

- SQLite
- 3NF schema design
- Query optimization
- CTEs & window functions

Core CS

- Data Structures
- DBMS
- OOP · ETL · Web Dev

EDUCATION

B.Tech, Information Technology

Sharda University
2021 – 2025 · GPA 7.52/10

CERTIFICATIONS

MERN Stack

Sharda University · Jun 2024

Complete Python Programming

Udemy · Nov 2022

PROFILE

Backend-focused developer skilled in Python, SQL, and Django, with hands-on experience shipping a production data application end-to-end — from schema design through a live, publicly deployed analytics dashboard. Comfortable writing efficient SQL, building REST APIs, and debugging production issues. Seeking an entry-level Software Engineer / Backend Developer role.

EXPERIENCE

Software Development Engineer Intern — LVC Solutions

Sep 2024 – Mar 2025

Addison, TX (Remote)

- Identified, reproduced, and resolved software bugs surfaced during QA and internal testing cycles, improving release stability.
- Executed functional and regression test suites to validate fixes prior to deployment, reducing repeat defects.
- Partnered with engineering to triage issues and documented root causes and resolutions for team-wide reference.

PROJECTS

Retail SQL Analytics Dashboard

[Live Demo](#) · [GitHub](#)

- Designed a normalized (3NF) SQLite schema modeling customers, products, orders, and order line items.
- Wrote analytical SQL using CTEs and window functions (RANK, LAG) to compute customer lifetime value, month-over-month revenue growth, and category-level breakdowns.
- Built and deployed a public, interactive Streamlit dashboard, taking the project from raw schema to a live end-to-end product.
